

THE CATWALK SPINAL CORD INJURY TRUST

**WE WANT THOSE AFFECTED BY SPINAL CORD INJURY
OUT OF WHEELCHAIRS AND BACK ON LEGS**

The CatWalk Trust is a privately funded non-profit organisation with the principal aim of raising funds to support the search for a cure for Spinal Cord Injury (SCI) paralysis.

IN 2007 IT IS ESTIMATED THAT WORLDWIDE;
AROUND 2.7 MILLION PEOPLE ARE LIVING WITH SCIS.

There are a number of organisations providing valuable rehabilitative support but CatWalk aims to challenge the current boundaries of research, enabling SCI victims to walk again.

"Only legs that work could make our days better! We want to do things, not have things,"
Catriona Williams
Founder & Chairperson

The CatWalk team and three of the Trusts' National Patrons

The CatWalk Trust's priorities are to:

- Support the scientific opinion that a cure for SCI can be found.
- Promote and generate funding for research into a cure for SCI.
- Identify and assist in medical research and development into techniques designed for the regeneration of the effects of Spinal Cord Injuries.
- Foster co-operation between all disciplines engaged in Central Nervous System research, regeneration and direct relief.
- Disseminate information about research into SCI.

The CatWalk Trust is fortunate to have formed a partnership with the Neurological Foundation of New Zealand, an incorporated charity with 30 years experience in combating neuro-degenerative conditions. The Neurological Foundation has a rigorous procedure for allocating their own funds. All our applications for funding go through this same vetting process.
